

LIST OF TABLES

S.No	Name of the Table	Page No.
3.1	Details of labeled attacks	37
3.2	Description of IDS features	38
3.3	Proposed vs Traditional accuracy details	43
3.4	Accuracy comparisons of Proposed model with other models on Different Datasets	43
3.5	Datasets and its properties	44
3.6	Leukaemia Data Results	50
3.7	Comparative study of present model to the traditional models on three cancer disease datasets by using accuracy measure	57
3.8	Run-Time comparison of the Proposed Feature selection measure to the traditional feature selection measures	58
3.9	Average Feature Ranking Measure of The Present PSO Model to The Traditional Ranking Measures	59
3.10	Comparative study of present model to traditional models by using average recall and precision rate on the training microarray datasets	60
4.1	Datasets and its properties	71
4.2	Performance analysis of classification accuracy on ovarian dataset on 10 fold cross validation.	71
4.3	Comparative study of present model to the traditional models on four microarray datasets by using accuracy measure	72
4.4	Comparative study of present model to traditional models by using average recall and precision rate on the training microarray datasets	72
4.5	Number of instances , attribute with computed ranked attributes of diabetes data for feature selection and ranking	74
4.6	Accuracy Comparison on three datasets (KDD, Credit, Diabetes)	75

5.1	Datasets and its properties	85
5.2	Comparative study of present model to the traditional models on four microarray datasets by using accuracy measure	86
5.3	Generated Patterns on leukemia dataset	86
5.4	Detailed Accuracy by Class wise on Cancer dataset	87
5.5	Comparative study of present classification model to the conventional models for true positive rate and precision rate	88
5.6	Average runtime(ms) of all training datasets	88
5.7	Comparison of the proposed classifier to conventional classifiers for gene relationships, average classification rate and runtime (ms)	90
5.8	Comparative results for existing and proposed models for Credit Dataset	94
5.9	Comparison between true positive and false negative rate on credit card dataset	94
5.10	Proposed Models Accuracy Comparison of Datasets using three proposed models	95
