

## LIST OF FIGURES

Figure 1.1	Example of classic biometric system	2
Figure 1.2	Anatomy of the human eye	4
Figure 2.1	Multimodal biometric block diagram	11
Figure 2.2	Image from database MMU	12
Figure 2.3	Image zooming from figure 2.2	13
Figure 2.4	Image of pupil using PLT enhancement	14
Figure 2.5	An iris-based recognition system	15
Figure 2.6	Iris segmentation	16
Figure 2.7	Iris normalization	18
Figure 2.8	Block diagram of a sclera recognition system	23
Figure 3.1	Processing flow of proposed method	43
Figure 3.2	Sample input images from UBIRIS.v2	45
Figure 3.3	Normalized images	45
Figure 3.4	Filtered images	48
Figure 3.5	The process flow diagram of the Contour features extraction	50
Figure 3.6	Contour images	53
Figure 3.7	Entropy images	56
Figure 3.8	Sample neuron	59
Figure 3.9	Sample small neural network architecture	59
Figure 3.10	Segmentation of iris, pupil and sclera regions in entropy images of UBIRIS.v2 database	62
Figure 3.11	CNN Model	62
Figure 3.12	The structure of a CNN	63
Figure 3.13	Sample input image pixel values	65
Figure 3.14	Feature detector stage	65
Figure 3.15	Convolution operation	66
Figure 3.16	Max pooling operation	67
Figure 3.17	Illustration of parameters of the fully connected layer and Softmax layers of CNN	68
Figure 4.1	HSV colour space	73

Figure 4.2	Frequency response half-amplitude bandwidth of (a) A selection of filters from Gabor. (b) Comparison of contour for Gabor filter and log Gabor filters (c) Log-Gabor filters (bandwidth = 1 octave)	77
Figure 4.3	(a) 2D Log-Gabor filter frequency response with large angular bandwidth (b) modified 2D Log-Gabor filter frequency response(c) 2D Log-Gabor (d) the actual portion adjusted 2D Log-Gabor filters (d) the hypothetical portion	79
Figure 4.4	Comparison of the Gabor and log Gabor functions	80
Figure 4.5	Sclera Y Shape Vessel Branch	81
Figure 4.6	Y shape vessel branch rotation and scale invariance	81
Figure 4.7	Sclera templates matching process for (a) same individual and (b) different individuals	85
Figure 4.8	Sclera Y shape descriptor count identification	85
Figure 5.1	Sample MMU database input images	97
Figure 5.2	Enhanced images	97
Figure 5.3	For input MMU database (a) Pre-processed images, (b) contour images, (c) entropy images, (d) segmented pupil, (e) segmented iris and (f) segmented sclera region	97
Figure 5.4	Sample UBIRIS.v2 input images	98
Figure 5.5	Enhanced images	98
Figure 5.6	For input UBIRIS.v2 database (a) Pre-processed images, (b) contour images, (c) entropy images, (d) segmented pupil, (e) segmented iris and (f) segmented sclera region	98
Figure 5.7	Iris, pupil and sclera segmentation regions in MMU study for sample input images	99
Figure 5.8	Iris, pupil and sclera segmentation regions from UBIRIS.v2 database for sample input images	100
Figure 5.9	Sample input MICHE database images	101
Figure 5.10	Enhanced images	101
Figure 5.11	For input MICHE database (a) Image pre - processed, (b) counter images, (c) entropy images, (d) segmented pupil, (e) segmented iris and (f) segmented sclera region	101

Figure 5.12	Graph for the comparison of the accuracy, sensitivity and PPV results for segmentation of iris in (a) MMU database (b) UBIRIS.v2	102
Figure 5.13	Graph for the comparison of Specificity, FNR and FDR results for segmentation of iris in (a) MMU database (b)UBIRIS.v2 database	102
Figure 5.14	Graph for the comparison of the accuracy, sensitivity and PPV results for segmentation of sclera in (a) MMU database (b) UBIRIS.v2	103
Figure 5.15	Graph for the comparison of Specificity, FNR and FDR results for segmentation of sclera in (a) MMU database (b)UBIRIS.v2 database	104
Figure 5.16	Pupil segmentation reference graph with precision, sensibility and PPV for (a) UBIRIS.v2 database (b) MMU.	105
Figure 5.17	Comparison graph for pupil segmentation in terms of specificity, FNR and FDR for (a) MMU database (b) UBIRIS.v2 database	105
Figure 5.18	Colour histogram graph for (a) iris region (b) pupil region of MMU database image	106
Figure 5.19	Sclera edge map images for MMU database images	106
Figure 5.20	Colour histogram graph for (a) iris region (b) pupil region of UBIRIS.v2 database image	107
Figure 5.21	Sclera edge map images for UBIRIS.v2 images	107
Figure 5.22	Colour histogram graph for (a) iris region (b) pupil region of MICHE database image	107
Figure 5.23	Sclera edge map images for MICHE database images	107
Figure 5.24	Comparison graph in terms of accuracy, sensitivity, specificity, and F-measure for (a) UBIRIS.v2 database (b) MMU database (c) MICHE database	116
Figure 5.25	Comparison graph in terms of PPV, NPV and MCC for (a) UBIRIS.v2 database (b) MMU database (c) MICHE database	117

Figure 5.26	Comparison graph in terms of GAR for (a) UBIRIS.v2 database(b) MMU database (c) MICHE database	118
Figure 5.27	Comparison graph in terms of FAR for (a) UBIRIS.v2 database (b) MMU database (c) MICHE database	118
Figure 5.28	Comparison graph in terms of FRR for (a) MMU database (b)UBIRIS.v2 database and (c) MICHE database	119
Figure 5.29	Comparison graph of proposed work with existing works in terms of accuracy	120
Figure 5.30	Comparison with the new CNN-SVM and CNN-PAIRWISE proposed ROC curves	121
